# Azure SQL Data Warehouse

2020년 03월

1

Chapter

# Azure SQL Data Warehouse

# 01 | The Fast, Flexible & Secure hub for all your data

MPP to quickly run  
complex queries on any  
scale

Optimize cost by scaling  
compute and storage  
independently

Built-in advanced security  
features including Encryption,  
Audit, Threat Detection,  
AAD and VNet

Seamlessly compatible across Microsoft and 3<sup>rd</sup> party services

## 2 Chapter

# Azure SQL DW Architecture

# 01 | Logical Overview

Control Node (1)

Compute Node (1 ~ 60)

Storage

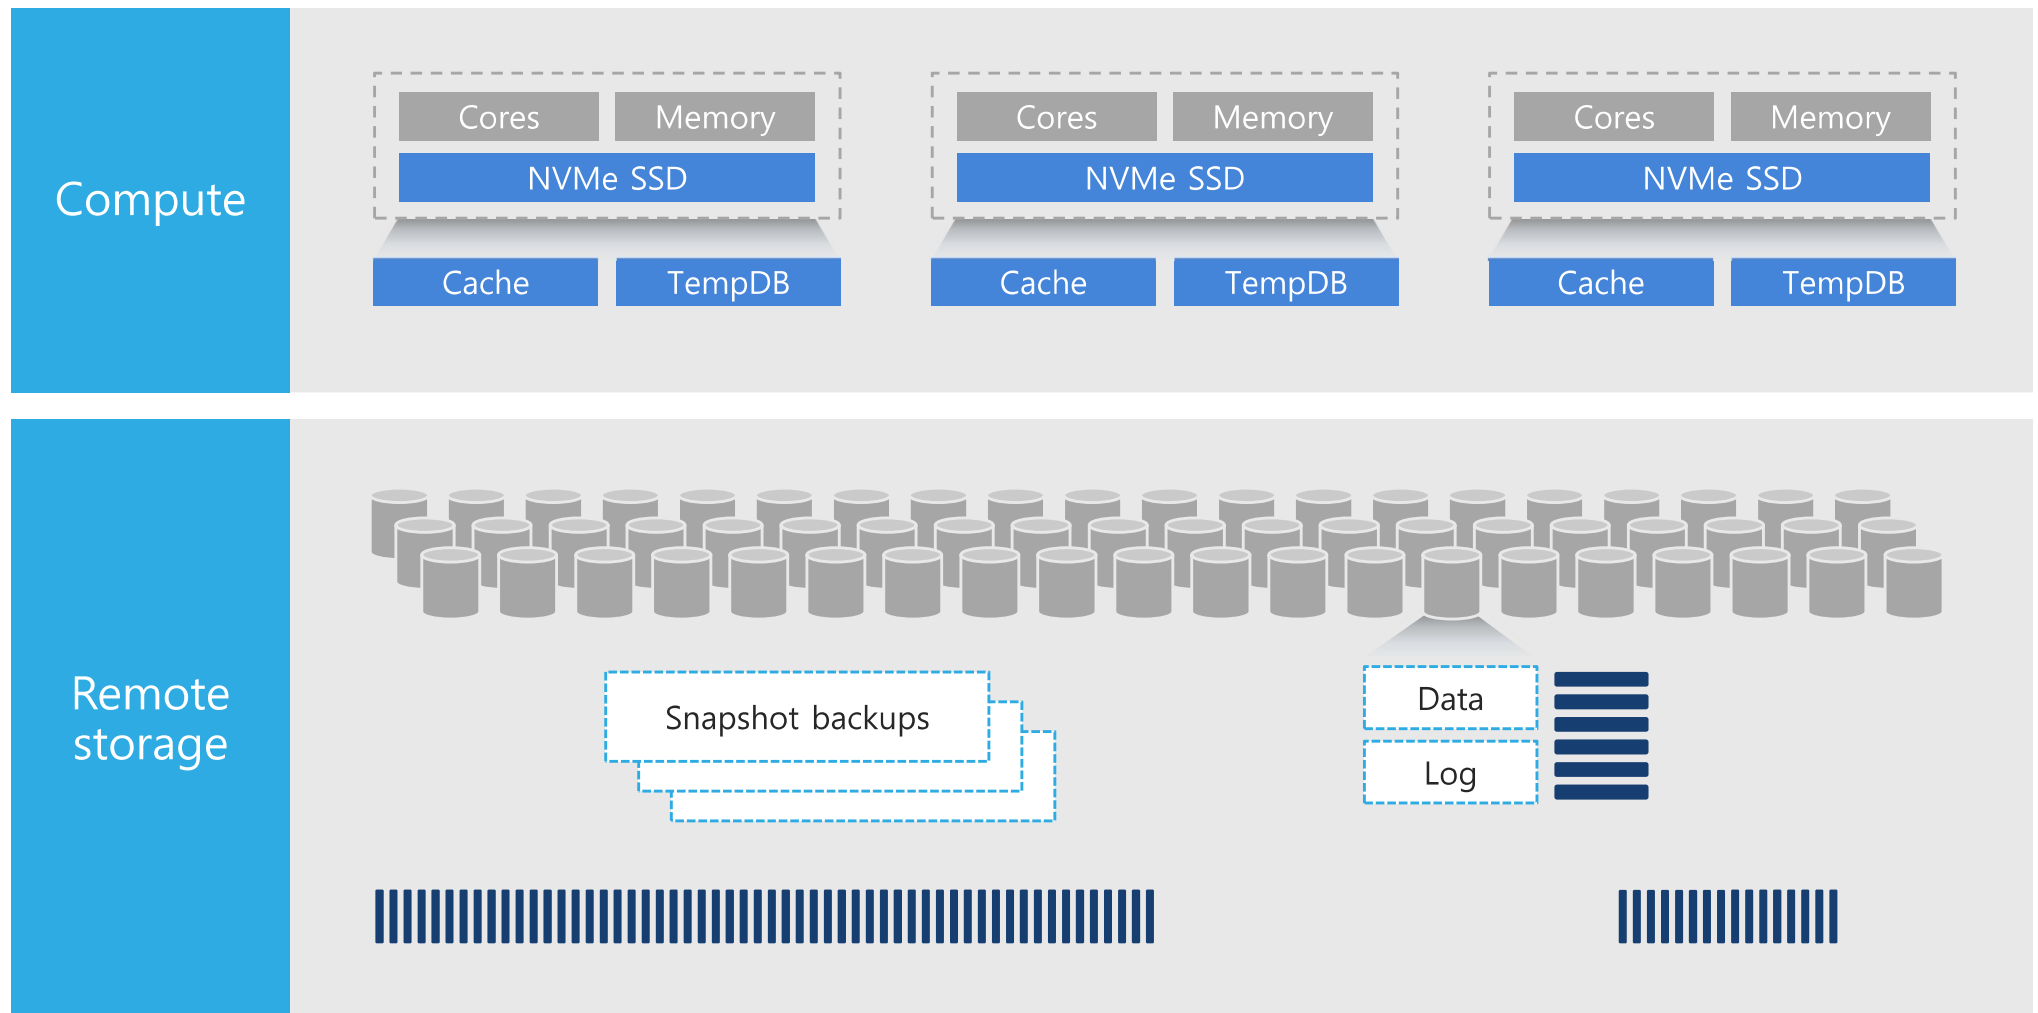

(60)

## 02 | DataWarehouse Unit

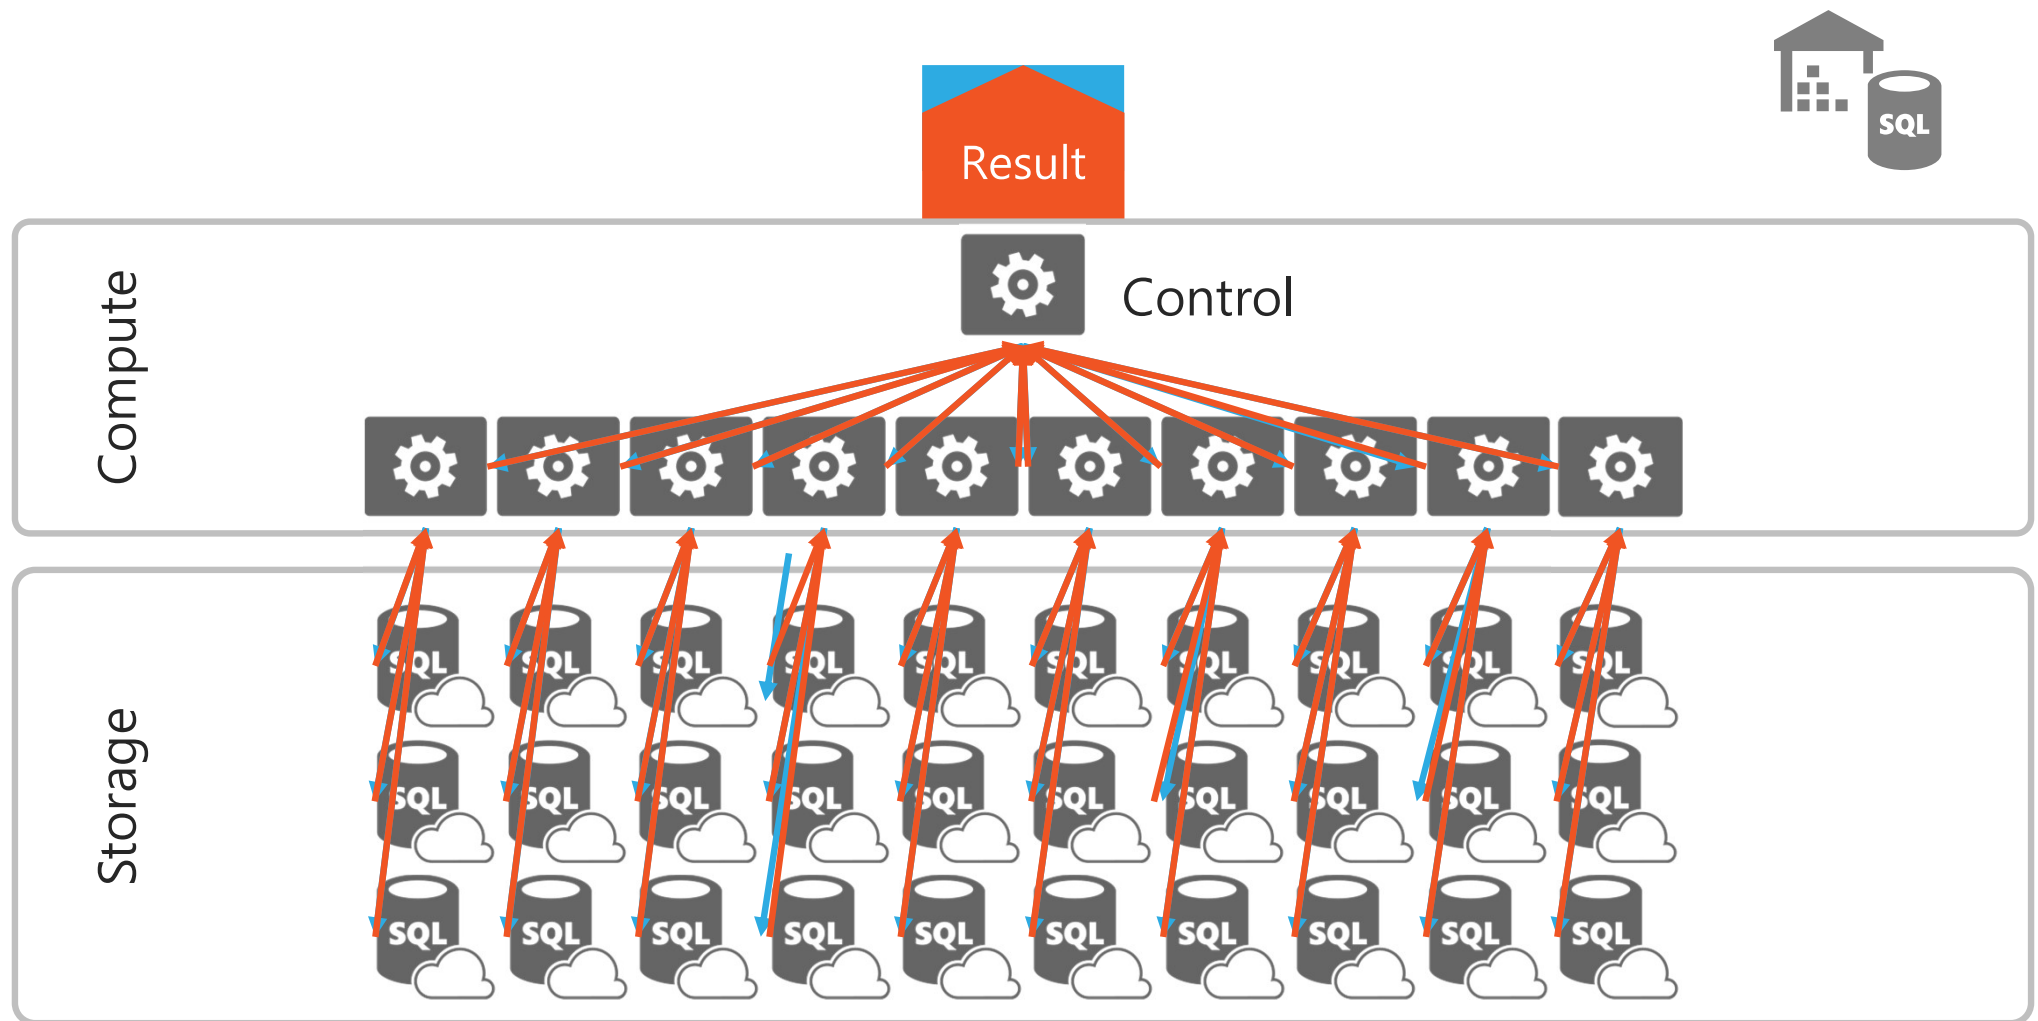

DWu 1000c

# 03 | Compute optimized Gen2 Architecture

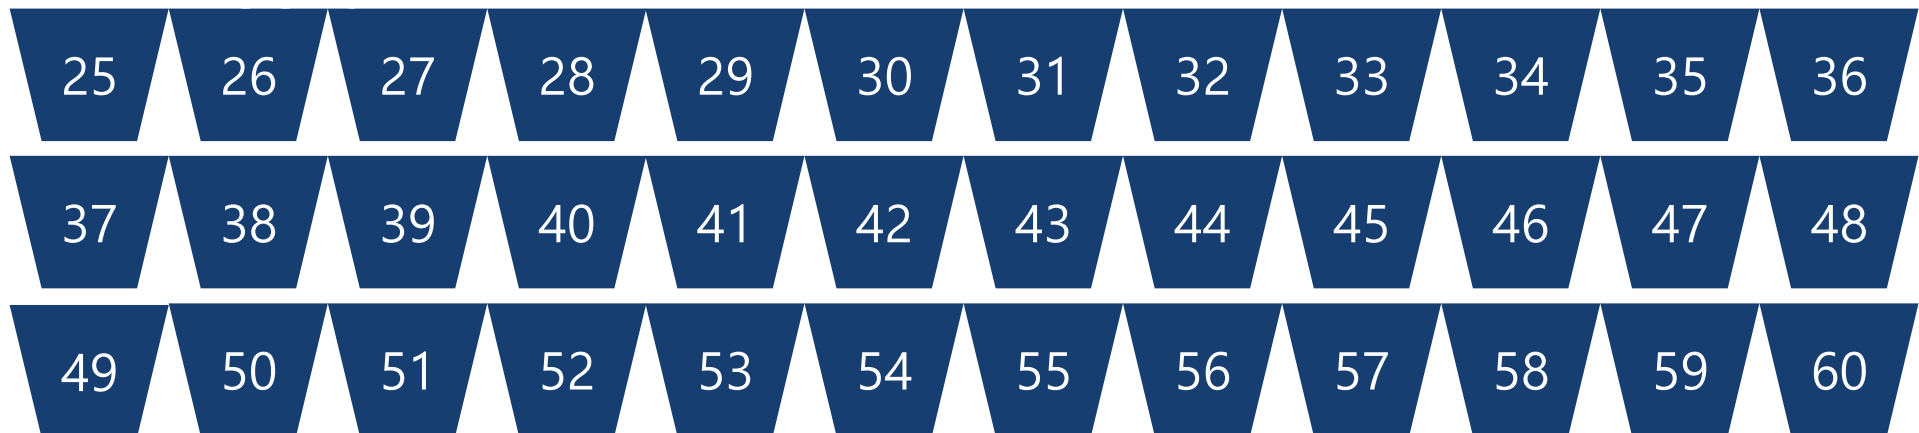

# 04 | Distributed Queries

## 05 | Table Distribution Options – Round Robin

- Data Distributed evenly across nodes
- Useful for large tables without a good hash

## 06 | Table Distribution Options – Hash

HASH (03)

- Data divided across nodes based on hashing algorithm
- Same value will always hash to same distribution
- Optimal for large fact tables
